

SR. **ROBOTIC** ENGINEER

Would you like to be part of a company that supplies the latest mobile robots to football giants like Liverpool F.C. and Manchester City? And do you want to lead a development team building the next generation of line marking robots while having lots of fun?

If you see yourself answering yes to the questions above, then the position as Senior Robotic Engineer at Turf Tank might be your next big career move.

JOB RESPONSIBILITIES

- ▶ Lead the new development team working on our next-gen robot
- ▶ Be part of hiring and training of new employees joining Turf Tank
- ▶ Be responsible for design/architecture of new robots
- ▶ Identify, adapt, and implement algorithms for sensing, localization, planning, and control

CANDIDATE PROFILE

- ▶ Turf Tank is looking for a strong and experienced profile, with the ability to lead and make essential decisions while also incorporating the vast amount of experience obtained from operating, maintaining, and developing existing products
- ▶ 5+ years of commercial experience in a fast-paced, agile environment
- ▶ Strong understanding of hardware, software, and electromechanical system integration
- ▶ Strong knowledge of the following topics: mobile robots, ROS / ROS2, localization, navigation, state estimation, path planning, control theory, software architecture and design, git, Linux and programming languages such as Python and C++

WHAT WE OFFER

- ▶ The chance to be the driving force in the development of the new robot line, in collaboration with the CTO and all your co-workers
- ▶ Great career opportunities in a company that is expected to grow more than 100% in the coming year
- ▶ The chance to define the architecture for the next line of robots and only work with latest technologies
- ▶ Location is at our headquarters in Hjørring, Denmark
- ▶ Remuneration is based on qualifications and experience

HOW TO APPLY

Send your application to job@iheadhunt.dk and mark your mail "Sr. Robotics Engineer" in subject field.
